To Keep Cream From Spattering When Beating—Do Not Use Oil for Ear Troubles—To Clean Jewelry Successfully—Other Cleaning Hints—Care in Dress Details—Household Hints.

THE WOES OF MRS. NEWLYWED

"What can I do to keep the cream from spattering all over everything when whipping it?" inquired Mrs. Newlywed.

"Cover the bowl with a piece of paper with a slit in the shape of a malted cross. Insert the egg beater into the slit, and the cream may be whipped without danger of spattering," answered Mrs. Neighbor.

THE COOK SAYS

To clean jewelry successfully and avoid scratches or marks of any kind when it is finished, Cook has found the following excellent: Wash the article in hot soap suds in which a little ammonia has been dissolved. Shake off the water and lay it in a small box of fine sawdust to dry.

She used gasoline to remove a stain on a serge dress and it left a ring around the part that was cleaned. To remove this she held the mark over a steaming kettle and it disappeared.

In washing a chamomile skin it should be wrung out of clean, soapy water without rinsing. This process renders the skin as soft and servicable as when purchased.

The annual coat of oil not only prolongs the life of willow and cane furniture, but it keeps it from becoming so dry that tiny splinters stick out.

The SICK'ABED LADY

One of the most prevalent fallacies among mothers, says Nurse, is the common idea that oil is the proper remedy for ear troubles. There is no more pernicious custom known to medical men than this dangerous form of treating pains, aches and maladies of the auditory canal. Whether ailments of the ear arise from colds, sore throats, boils, or infections of other kinds, whether they occur in the old or in the young, there is no more dangerous application known than the injection of oil into this cavity.

Hot water with a little boric acid powder dissolved in it, syringed gently into the ear with a rubber syringe, is a simple method of relief.

Ice bags placed behind and beneath

the ear are also helpful. But never, under any circumstances, should one be persuaded to follow the ever ready advice to use oil.

VALUE OF CARE IN DRESS DETAILS

One thing—If it is of vast importance—the insistent simpler dressing has brought to the surface, and that is the value of the fine delicate finishing touches, writes Mrs. Jack May in the Queen (London). Only the other day I picked up a slightly soiled gray Georgette blouse at one of the exclusive houses now holding a sale of models, and wondered for the space of a second or so why it was so attractive. For the style was simplicity itself, the front and back united on the shoulders beneath an applied band, the fullness of the latter laid in a series of small boxplaits, and the fronts just slightly gathered and faced back with broad, loose pieces of gray faille.

There were deep cuffs and a high up-and-down collar of the faille, cut away in front, and supported by a narrow cravat of black moire ribbon. It all, I admit, sounds nothing in the telling, whereas the charm of the model was self-evident on closer examination; it was the fine touch imparted to every detail, the delicate workmanship it never pays any but the best modistes to put into things, as, for example, the tiny piping with which the narrow shoulder band of Georgette was set on, and the group of similar pipings that finished both the color and cuffs. These were not done in a moment, nor by two fingers, either.

One talks so glibly of some dress or blouse being adorned with narrow open-work beading, only the few realizing the amount of time such real decoration takes to adjust. Then I know of some supremely simple but appreciably priced blouses of filmy voile, their value resting in actual drawn-thread work. Hand work, and expert hand work, was never more in request than in the case just now, since no machine in the world can secure the requisite lightness of effect, nor impart that elusive "touch."

The latter is largely an inherent sense; it can perhaps be cultivated to some extent, but the real thing is born, the outcome of refined instinct.

HOUSEHOLD HINTS.

When making uncooked icing do not beat the white of egg; simply stir in the powdered sugar until stiff enough. This was told by a professional cakemaker.

Keep a cream bottle on the sink and drop all bits of soap into it and fill with hot water. This liquid when cold makes perfect starch. Use the liquid instead of cold water when dissolving the starch before adding the boiling water. You will also find the liquid useful for dishwashing.

Once a month I remove the brush from the carpet sweeper and wash it in hot suds. Hang it from two strings on the line and when dry pour over it kerosene oil. When this has dripped dry replace the brush in the sweeper. This brightens the rugs and discourages insects such as moths, roaches, ants, etc. Also pour kerosene around the stone step from the porch (back of course) and near the scrap-pile and kitchen screens. This keeps away flies.

See "The White Sister" by all means. Open continuously from 2 until 11. Come early. Tuesday, Wednesday, Thursday.

ANCHORAGE IS ON THE BOOM

City in Alaska Has Grown From Wilderness to 5000 in Six Months.

Washington, Aug. 31.—Growth of the new Alaskan railroad construction terminus at Anchorage, Alaska, from a wilderness six months ago to a city of 5000 population today, with big government realty transactions to take care of the influx of people, is told in telegraphic reports to the interior department.

Commissioner Tallman of the general land office, received a message from Chief Field Agent Christensen, saying that in addition to a recent sale of 600 lots of government domain at Anchorage at a total price of \$145,000; 180 more lots were sold Saturday at a total of \$23,000.

The site is one of the termini of the new government railway from Seward to Fairbanks, for which Congress already has appropriated \$1,000,000 out of a prospective outlay of \$35,000,000.

TEUTON TRENCHES ARE SHELLED BY FRENCH

Paris, Aug. 30, 10:30 p. m.—The war office tonight made public the following official communication: "Artillery fighting has taken place in Artois and in the region of Quennewies, where our fire has scattered

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous membrane of the ear. When this tube is inflamed you have a deafness which is called catarrh of the ear. It is entirely curable, and when the inflammation can be taken out and the tube restored to its normal condition, hearing is restored. We will give One Hundred Dollars for any case of Deafness caused by catarrh that cannot be cured by Hall's Catarrh Cure. Send for circular, free. F. J. CENEY & CO., Toledo, O. Sold by Druggists, 7c.

Take Hall's Family Pills for constipation.

some of the enemy's trenches and hit some German encampments.

"In the Argonne our batteries have stopped several times attempted bombardments by the enemy.

"A rather violent cannonade has taken place in Lorraine, toward Moncel Bezenge and Chazelles, and also in the Vosges in the region of Rabodeau, Lanouls and Linge."

Sixteen Boys Drown.

London, Aug. 30, 5:07 p. m.—An officer and sixteen boys of the training ship Cornwall were drowned in the Thames today near Purfleet, while engaged in boat practice. A tug collided with their boat and sank it.

SEATTLE SUN SUSPENDS.

Seattle, Wash., Aug. 30.—The Seattle Evening Sun, which, after a suspension of several months, resumed publication four months ago, the employees having obtained possession of the plant by means of labor claims, again ceased publication today, and a trustee was appointed to wind up the affairs of the paper.

A Real Flesh Builder For Thin People

WHO WOULD INCREASE WEIGHT.

Thin men and women who would like to increase their weight with 10 or 15 pounds of healthy "stay-there" fat should try eating a little Sargol with their meals for a while and note results. Here is a good test worth trying. First weigh yourself and measure yourself. Then take Sargol—one tablet with every meal—for two weeks. Then weigh and measure again. It isn't a question of how you look or feel or what your friends say and think. The scales and tape measure will tell their own story. Many people, having followed these simple directions report weight increases of from five to eight pounds with continued gains under further treatment.

Sargol does not of itself make fat but making your food its purpose is to help the digestive organs turn the fats, sugars and starches of what you have eaten, into rich, ripe, fat producing nourishment for the tissues and blood—prepare it in an easily assimilable form which the blood can readily accept. A great deal of this nourishment now passes from thin peoples bodies as waste. Sargol is designed to stop the waste and make the fat producing contents of the very same meals you are eating now develop pounds and pounds of healthy flesh between your skin and bones.

Sargol is non-injurious, pleasant, efficient and inexpensive. A. R. McIntyre Drug Co. and other leading druggists are authorized to sell it in large boxes—forty tablets to a package—on a guarantee of weight increase or money back as found in every package—Advertisement.

SHARKS EAT THE CREW OF F-4

No Bodies Found When Examination Is Made of Submarine at Honolulu.

Honolulu, Aug. 31.—The hull of the submarine F-4, lost in Honolulu harbor, March 25, with her crew of 22 men, and raised and placed in drydock yesterday, today lies exposed to view, the work of pumping out the drydock and raising the shattered and torn submarine from the waters of the harbor having been completed during the night.

But the craft has not yet yielded up its secret. No trace of the bodies of the unfortunate crew has been discovered, nor has the brief examination thus far made thrown any light on the cause of the accident that caused the diver to sink and fall to come up again.

The F-4 lies on her starboard side in the drydock. When the examining board, composed of Rear Admiral C. J. Boush, Lieutenant Commander Julius A. Furer and Lieutenant Kirby B. Crittenden, entered the vessel, they found the starboard side and bottom filled with debris, battery plates and some sand and mud.

If any bodies remain in the F-4, they are underneath the debris. Doubt is expressed, however, if any will be found, for the great holes torn in the submarine, only part of which were protected by mats during the months of raising operations, allowed the marine creatures with which the waters of Hawaii swarm, to enter and it is anticipated that further search will merely disclose the fact that the bodies of the crew have been entirely destroyed.

The naval officers in charge of the work state that the debris will be removed from the vessel during the day and a thorough search made for bodies.

In addition to the gaping holes in the stern of the submarine, a big hole has been torn in the forward part. The investigating board has not yet definitely ascertained whether it was this that occasioned the loss of the vessel or whether the hole was torn in the hull during the lifting operations.

REFUGEES ARE ON AMERICAN SHIP

Europeans Expelled From Turkey Are on the Scout Vessel Chester.

Paris, Aug. 31, 11:45 a. m.—The United States scout ship Chester has arrived at Canea, Crete, with 470 refugees expelled from Beirut, Syria, by the Turks, according to a Havas dispatch from Athens. The refugees include citizens of all the quadruple entente powers as well as of several other nations.

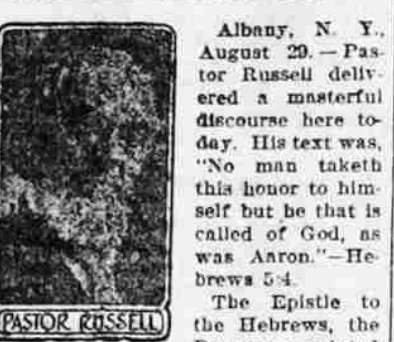

The Chester will return soon to Beirut for another ship load of Europeans who have been ordered out of Turkey. Another American warship is expected at Canea with refugees from Alexandretta, Asiatic Turkey.

Every time some people bury the hatchet they dig up a hammer.

A GREAT PRIESTHOOD DIVINELY APPOINTED

"Thou Art a Priest For the Age After the Order of Melchisedec."

God's New Order of Priesthood—Each Member Called and Chosen—The Great High Priest—His Sacrifice of Himself—The Under Priests of This Order—Membership Limited in Number—The Purpose For Which the Priesthood is Ordained of God.

Albany, N. Y., August 29.—Pastor Russell delivered a masterful discourse here today. His text was, "No man taketh this honor to himself but he that is called of God, as was Aaron."—Hebrews 5:4.

The Epistle to the Hebrews, the Pastor pointed out, shows that God had ordained a higher priesthood than the Aaronic Order of the Mosaic arrangement; and that upon our Lord Jesus was conferred the great honor of being the Head of the New Order, the Church being under priests. While on earth Christ could not be a priest; for Aaron's family constituted a Divinely ordained priesthood, in which none others could presume to take part without God's invitation. To this day the Jews respect the Aaronic priesthood; and since they cannot know who belongs to Aaron's family, they have no priest and no such service as a priest could render.

The thought of another priesthood astonished the Jews of St. Paul's day. They could not understand how any priesthood could be higher than the Aaronic Order. Nevertheless, through the Prophet David, God had long before declared our Lord's Priesthood: "Thou art a priest forever after the Order of Melchisedec." (Psalm 110:4.) Elsewhere we read that Melchisedec was "the priest of the Most High God"—a priest upon his throne." (Genesis 14:18; Hebrews 7:1-4.) God has conferred a very great honor upon our Lord, has appointed Him to be the world's Redeemer, High Priest and King, through whom will come all blessings designed for humanity.

"Worthy to Loose the Seals."

The speaker then demonstrated that before our Lord could be thus highly exalted, He must be thoroughly tested, and proved worthy to be the great Antitype of Melchisedec. Amongst other Scriptures examined was our Lord's own statement, as recorded in Revelation 5, where the Divine Plan for human deliverance from sin and death is pictured. God is shown as seated upon His Throne, holding in His hand a Scroll, written within and without, and sealed with seven seals. This represents the Plan which God had purposed before the foundation of the world, and which was known only to Himself. Throughout Heaven and earth the proclamation was made: "Who is worthy to loose the seals and to look therein?" Nobody came forward.

Finally an angel said to St. John, "The Lion of the tribe of Judah hath prevailed." The Lion was the Strong One of Judah, of which tribe God had propheticly declared that Messiah should come—of David's lineage. The Strong One could do the work; but all mankind were imperfect, incompetent. Jesus was sent into the world perfect—in the image of God. Heretofore no one had proved worthy; for the conditions which God had attached were very stringent. He was looking for One competent to be a Prime Minister, as it were, to represent Him fully and to be associated with Him forever. For so high a position He had purposed that this One should be made partaker of the Divine nature—immortality. Our Lord must demonstrate His loyalty to the fullest degree before He could be counted worthy of this high exaltation.—1 Tim. 6:16; John 5:26, 27.

According to the Law our Lord could do nothing in His Priestly Office until He was of age. When His thirtieth anniversary came, He presented Himself in consecration to the Father. At Jordan He began to carry out the Divine Plan presented in the Scroll, and mentioned by the Prophets of Israel. There the father opened the eyes of His understanding. There He became the slain Lamb. For three and a half years God proved the One who was to become the antitypical Melchisedec, the Priest upon His Throne, partaker of the Divine nature. Surely He was faithful, even unto the death of the Cross! Now He is highly exalted, at the Father's right hand.—Phil. 2:8-11.

Further Contents of the Scroll.

The Pastor showed that the Scroll also revealed that God had purposed calling out from the world a Church of under priests, to share in the sufferings of Christ and the glory to follow. All the work of the Gospel Age has been with a view to perfecting this company, members of the great antitypical Priest and King. Whoever consecrates himself to God, is begotten of the Holy Spirit and walks faithfully the narrow way of self-sacrifice will become a joint-heir with Christ, a fully accepted member of the great Melchisedec Order of Priesthood. As soon as the last members are completed, the 144,000 will stand with the Lamb upon Mount Zion, ready for the Kingdom work.—Revelation 14:1-5.

JOHNSON MODIFIES CATTLE QUARANTINE

Sacramento, Cal., Aug. 30.—Governor Hiram W. Johnson issued today a proclamation releasing many states from California's quarantine against foot and mouth disease, provided shipments of cattle, sheep and swine are made upon certificates of state veterinarians, or if approved state inspectors are sent to California. It becomes effective September 1.

The proclamation applies to Arizona, Colorado, Nevada, Nebraska, North Dakota, New Mexico, South Dakota, Utah, Washington, Wyoming, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Texas and the republic of Mexico.

Oakland, Cal., Aug. 30.—The American Veterinary Medical association held its annual convention here today and plunged at once into discussion of ravages of the foot and mouth disease in the year past. Dr. John R. Mohler, assistant chief of the federal bureau of animal industry, said attacks on bureau for its efforts to stamp out the disease resembled crusades years ago against men who fought tuberculosis.

SUFFRAGE PARADE IN NEW YORK CITY

New York, Aug. 31.—Plans were launched today for a suffrage parade here on October 23, which the promoters expect will be the greatest in point of numbers the world has known.

The empire state campaign committee hope to have 20,000 men and women in line. One division will represent the 26 counties in which the women's international alliance is organized. Preliminary parades called yellow rallies for suffrage will be held during September.

CHEMICALS IN UNITED STATES

This Country Is Short of Many Things Made in Germany.

New York, Aug. 31.—Not only the dyestuffs situation but every phase of the chemical industry will be taken up by agents of the department of commerce sent here by Secretary Redfield to investigate conditions in those trades caused by the war. Dr. Thomas H. Norton, the chief investigator, who began work here today, said:

"We are anxious to learn how we can utilize the coal industry, in which we are now wasting products worth \$100,000,000.

"Germany utilized every ounce of coal by-products but only 16 per cent of our coke furnaces are equipped for reclaiming coal tar products. Only a few are actually reclaiming benzol, naphthalene and carbolic acid, which are the bases of most of the coal tar products. Unfortunately benzol and carbolic acid are used largely in explosives, with the result that these products are mostly taken up by the ammunition factories.

"The potash problem is large. We import annually from Germany \$15,000,000 worth of potash, while off the coast there are supplies of kelp which are believed to have a value of \$150,000,000, now going to waste. We have at our door enough potash to meet the demands of our crops, to supply the needs of our crops, tobacco, grain and other produce, in the way of fertilizer. We have always been dependent on Germany for potash.

"Photographic chemicals are vanishing.

"We do not want to get caught in such a plight again and the department of commerce wants to stimulate American development so we can supply our own demands and then branch out into the world's trade in chemicals.

"After this investigation is concluded," said Dr. Norton, "we will be in a possible position to determine what can be done to relieve immediate necessities, although I am firmly of the belief that a strong domestic dyestuff industry can be built up eventually."

"The funeral problem is large. We import annually from Germany \$15,000,000 worth of potash, while off the coast there are supplies of kelp which are believed to have a value of \$150,000,000, now going to waste. We have at our door enough potash to meet the demands of our crops, to supply the needs of our crops, tobacco, grain and other produce, in the way of fertilizer. We have always been dependent on Germany for potash.

The DOCTOR'S ADVICE

by Dr. Lewis Baker

"I'll write: 'How may I regain my weight and strength? I'm so weak and thin, I should weigh forty-five pounds more.'"

Answer: You will find just the proper tonic and flesh producer you require by using regularly three grain hypophosphite tablets. They build up strength, health and flesh. I have prescribed them many times and they are highly recommended.

"Grey" writes: "My hair is coming out. I have dandruff and itching scalp."

Answer: I always recommend the use of plain yellow minoyl to restore the scalp to healthy condition and overcome dandruff and falling hair. Minoyl contains no alcohol to dry the hair and make it brittle. It is the best hair and scalp tonic I know of.

"Nagara" writes: "My mind seems to be getting weak and my whole system seems to be losing strength fast. Please suggest something I may take to relieve this depressed condition, and restore to my system new life and energy and ambition. I feel twenty years older than I am."

Answer: Your nerve cells and tissue cells have not been receiving proper necessities, although I am firmly of the belief that a strong domestic dyestuff industry can be built up eventually."

COLONEL DIES OF TYPHOID FEVER

Laredo, Tex., Aug. 31.—Carlos S. Pizarro, a colonel in the Carranza army, died of typhoid fever in the City of Mexico, last Saturday, according to advices received at Carranza headquarters in Nuevo Laredo today.

At the time of the capture of Monterrey from Villa about a year ago, Pizarro liberated Consul General Hanna from the penitentiary there. Villa officials had held Hanna incommunicado on a charge of alleged anti-Villa activity.

FUNERAL HELD IN CHEYENNE, WYO.

Cheyenne, Wyo., Aug. 31.—Funeral services for the late Mrs. John J. Pershing and three young daughters, who perished in a fire at the Presidio, San Francisco, last week, were to be held here today, Bishop N. S. Thomas of Cheyenne preaching the sermon. Commercial activity in all of the larger Wyoming towns was to cease during the services out of respect to the dead.

The funeral party which arrived early today from Presidio included General John J. Pershing, husband and father of the dead; United States Senator Warren of Wyoming, father of Mrs. Pershing, and other members of the Warren family.

The funeral procession from the train to the home of Senator Warren passed through long rows of citizens and representatives of fraternal societies, who stood with bared heads. At Lakeview cemetery one grave has

"Marj" writes: "Please tell me what I can do to get rid of this tired feeling. My mother says my blood is in bad condition."

Answer: If you have had blood, you need a good system cleanser, blood purifier and tonic. Such you will find in three grain sulphur tablets (not sulphur pills) which must be given, but only initials or fictitious name will be used in my answers. The prescriptions can be filled at any well-stocked drug store. Any druggist can order of wholesaler.

"W. C. L." writes: "Will you please tell me what to take for kidney trouble? I have constant headache, chills and fever. My feet swell and my complexion is terribly muddy looking, and I have sacks under my eyes. I have pain in my back all the time. I am afraid of Bright's Disease."

Answer: Be careful not to take cold. Get a tube of "balmwort" tablets at once, and take according to directions. These are really good for you. Please let me know what they were."

Answer: I have always recommended five grain arbolone tablets to reduce weight. Send your name and address. Tubes with full directions—Advertisement.

IMPERIAL VALLEY CLAIMS TO LAND

Washington, Aug. 31.—Millions of dollars worth of lands in the Imperial Valley of California, that were withheld long ago by the reclamation service, involving many claims of squatters, are to be adjusted soon by the interior department. The claimants asserted that in many instances they were led by what they regarded as assurances from department officials to believe that if they held on long enough the lands would become theirs.

Government agents have investigated these claims and Commissioner Tallman, of the general land office, is reviewing the evidence. He will shortly report to Secretary Lane and it is understood that it will show that while in a number of cases the squatters actually improved the lands, there were fewer instances of that kind than are claimed.
